## Task

Prepare frontend stack and build on this simple design of webpage. And expand it if you want.

Design: <https://imgur.com/a/GzT7xhW>

*(It's not about to look exactly like this, it more about code, and structure)*

- ☐ Code will be in repository (github)
- ☐ Code in english
- ☐ Use your stack to generate your website
- ☐ Code will be properly formatted
- ☐ Readme with instructions how to run and build your project
- ☐ Design your folder structure
- ☐ Use any naming system for CSS and type in Readme which you choose
